**FOR IMMEDIATE RELEASE**

## **Project Green AV Celebrates Its 1 Year Anniversary**

**Bohemia, NY — June 12, 2009**

Project Green AV (PGAV) launched June 12, 2008 with a mission to raise awareness and encourage Green AV. The objective continues to be to educate AV users and industry colleges about Green technology and environmental responsibility through an AV industry forum. PGAV is proud of its accomplishments thus far and the initiative taken to introduce and expand upon a variety of Green options and opportunities available to AV users. In light of its efforts Project Green AV celebrates its 1 Year Anniversary.

PGAV has been able to fulfill an admirable mission, obtaining a significant number Green followers and contributors across the AV industry. Since its inception Project Green AV has grown steadily. PGAV has been fortunate enough to gain the support of several key players in the AV and communications industry. In particular Projector Lamp Services (PLS), a Green manufacturer and recycling center for projector lamps, is responsible for introducing the environmentally responsible web source. PLS endorses PGAV in all its efforts and most recently sponsored PGAV's first Webinar, "Green Building: Challenges & Opportunities for AV." The webinar presented opportunities for the growth of the audio visual industry with emerging Green businesses and government regulations. The webinar proved to be a great success and further demonstrated the commitment to environmental responsibility shared by our society. PGAV will continue to support the efforts of the AV industry and Green trendsetters. In 2009 PGAV will expand upon the Green community and aims to persuade new and continued participation in its efforts and activities.

PGAV will continue to promote more Green opportunities that offer solutions for the current and future success of the AV industry. Turning Green ideas into Great ideas that will make a difference in our world will remain a fundamental purpose of Project Green AV.

Project Green AV is the comprehensive industry resource for Green information & ideas for the Audio Visual industry. Project Green AV is committed to bringing together AV industry colleagues and consumers to learn about, discuss and teach environmentally responsible and cost-effective solutions for AV purchases, installation, new technology and projects.
